shajithniyaz@gmail.com | +919677417601 | Chennai, India

Summary

Cybersecurity Data Engineer & Security Analyst with 4+ years of experience in vulnerability management, penetration testing, and data engineering. Proven track record in building Looker dashboards, custom web portals, and scalable ETL pipelines to aggregate vulnerability KPIs and automate security reporting. Skilled in using SQL to extract data via vendor APIs, translate complex technical risks into actionable business metrics, and deliver executive-level visibility that drives risk remediation.

Skills

- **Data Engineering & ETL Pipelines:** Architect, build, and optimize scalable ETL pipelines using Python, SQL, and REST-APIs to ingest, transform, and normalize high-volume cybersecurity and vulnerability datasets.
- **BI, Looker Dashboards & KPIs:** 3+ years of experience designing data models, interactive Looker dashboards, and custom web tracking portals to model complex vulnerability metrics, key operational KPIs, and executive reporting.
- **Vulnerability Management & Governance:** Deep understanding of the vulnerability management lifecycle, CVEs, risk-based prioritization, secure coding practices, and aligning security findings with business outcomes.
- **Application Security & Pentesting:** Conduct web, API, and network penetration testing using manual and automated techniques to validate, assess, and remediate enterprise security vulnerabilities.
- **Security Assessment Management:** Plan and coordinate end-to-end security assessments, including engagement planning, risk-based scoping, execution, reporting, remediation tracking, and validation.
- **Stakeholder & Leadership Engagement:** Translate complex technical security risks and data analytics into clear, actionable recommendations, and strategic roadmaps for leadership and cross-functional teams.

Experience

- 07/2022 - Current
Verizon
Chennai, India
 - **Penetration Tester**
 - **Data Engineering & Vendor Ingestion:** Architected SQL-driven ETL pipelines using REST APIs to automate data ingestion from security platforms (Resolve, VCSD & JIRA), normalizing over 100 engagements into centralized SQL data repositories.
 - **Looker Dashboards & Portal Engineering:** Built 20+ Looker dashboards and custom tracking portals (vcsdatamarketplace.verizon.com, rspentestmetrics.verizon.com), defining key vulnerability remediation KPIs across enterprise application teams.
 - **Penetration Testing & Vulnerability Assessment:** Conducted deep-dive web and API penetration tests on 10+ high-risk production applications, identifying critical vulnerabilities and validating remediations using automated and manual exploit techniques.
 - **Executive Strategy & Stakeholder Alignment:** Partnered directly with senior business leaders and 15+ engineering groups, presenting monthly risk analytics to align remediation priorities, budget allocation, and SLA compliance metrics.
- 06/2021 - 06/2022
HighRadius
Hyderabad, India
 - **Web Developer**
 - Designed and optimized responsive web pages and improved site performance.

Education and Training

- 06/2022
Chennai
 - **Bachelor of Technology** in Computer Science and Engineering
SRM IST

Certifications

CompTIA Security+ | ISC2 CC | Fortinet NSE
